EDUCATION

Birla Vishwakarma Mahavidyalaya

BTech in Information Technology - CPI - 7.14

Anand, Gujarat

2021 - 2025

Riverdale Academy

Gujarat Board, Science Stream - Percentile Rank - 93.71

Surat, Gujarat

2021

TECHNICAL SKILLS

Languages: Python, SQL

Frameworks & Libraries: FastAPI, LlamaIndex, Scikit-learn, OpenCV, Pandas, NumPy

AI & GenAI: LLMs, RAG, OCR, Computer Vision, FastEmbed, Tree-sitter

Databases: PostgreSQL, MongoDB, MySQL, pgvector

Tools & Platforms: Docker, Git, GitHub, Ollama, Gemini, Groq

WORK EXPERIENCE

Hexylon Analytics

AI/ML Developer

Ahmedabad, India

December 2024 - present

- Developed AI-powered features for an **Agentic ERP** system using LLMs, RAG, OCR, and workflow automation.
- Built and integrated **RAG** pipelines, **OCR** services, and **Computer Vision** modules for enterprise applications.
- Collaborated with development teams using **Git** and **GitHub** for version control, code reviews, and feature releases.

EduNet Foundation

Machine Learning Intern

Anand, India

May 2024 - June 2024

- Worked on a Driver Behavior Monitoring System using Python and machine learning techniques as part of a team project.

PROJECTS

Agentic ERP

January 2025 - present

Tech Stack: Python, FastAPI, PostgreSQL, Scikit-learn, LLMs, OCR, OpenCV, vLLM

- Developed **AI-powered workflows** for an ERP platform using LLMs, RAG, OCR, and agent-based automation.
- Built a **background task scheduler** supporting one-time, interval, and cron-based execution for AI-driven workflows and report generation.
- Developed and maintained **FastAPI services** for AI workflows, system integrations, and enterprise automation.
- Developed an **ML-based absence risk prediction** module using a **Random Forest classifier**, engineering 12 temporal and behavioral features from employee leave data to **predict 30-day co-leave risk**, with feature-importance analysis and **hierarchical clustering** for absence pattern discovery.
- Reduced AI workflow response times from approximately 15 seconds to 5 seconds by optimizing model inference and orchestration using **vLLM**.

CodeBase RAG

Dec 2025 - March 2026

Tech Stack: Python, FastAPI, PostgreSQL, pgvector, LlamaIndex, Gemini AI, Docker

- Built a **codebase-aware RAG** system that indexes repositories and answers code-related queries with source citations.
- Implemented **AST-based** code chunking using Tree-sitter and generated embeddings with FastEmbed, storing vectors in **PostgreSQL** with pgvector.
- Built a differential sync mechanism using file hashing to detect changes and avoid unnecessary re-indexing.
- Integrated **Gemini** and **Ollama** with automatic fallback support and added Git history analysis for repository-aware responses.

CERTIFICATIONS

- LangChain - Develop AI Agents with LangChain & LangGraph - February 2026
- Complete Data Science, Machine Learning, Deep Learning, and NLP Bootcamp by Krish Naik - January 2025

EXTRACURRICULAR ACTIVITIES

- **2nd Runner Up** at Project Expo 2025 in IT Department
- **Odoo Combat 2024 Finalist** got selected among top 100 teams out of 650 teams nationwide
